

Solar Power Bank User Manual

Precautions before use

Recharge the power bank completely at the first time before use.

Ensure that the voltage of the device is compatible with the power bank.

Read these instructions carefully. In case of improper use, Li-polymer batteries can be dangerous and cause fire.

Basic operation:

Turn on: single press the button, power bank on; when connected with device, the power bank will be on automatically.

Turn off: if not connected with any device or device is fully charged, the power bank will turn off automatically after 10 seconds.

Hold the button for 2 seconds to turn on the Flashlight. When the flashlight on, press the button once to enter SOS signal mode. Under SOS signal mode, press the button once to enter warning signal mode. Under warning signal mode, press the button once to turn off the Flashlight.

LED Light(●ON ○OFF)	Capacity
○ ○ ○ ○	0%
● ○ ○ ○	0%-25%
● ● ○ ○	25%-50%
● ● ● ○	50%-75%
● ● ● ●	75%-100%

Power indication: Press the button to check the remaining battery charge. The power bank can be recharged by solar energy when it's under the sun rays or in the environment with light strong enough. The green LED light is on when the power bank is being charged by solar energy.

Specifications :

Current output : 2A

DC input adapter : 5V

Safety Protection: Intelligent protection circuit design provides over-charge, over discharge and short circuit protection. **NOTA: ALWAYS USE A SOURCE OF QUALITY USB 5V.**

Battery type: Lithium Polymer

Water resistant (Do not use under water, the product is only resistant against splashes or rain)

Remark: For Apple products, we recommend using Apple charging cables.
